

# Beka Kanchaveli

PRINCIPAL PRODUCT DESIGNER & FRONTEND ENGINEER

hello@itsbeka.com • itsbeka.com

## SUMMARY

Principal Product Designer and frontend engineer with 10+ years building 0-to-1 enterprise products for AI, cybersecurity, fintech, and developer tools companies. Rare hybrid who moves fluently from UX research and design systems through React, Vue, and Tailwind implementation to AI-assisted workflows with Claude Code and MCP — consistently the sole designer on high-stakes strategic initiatives. Work has supported \$285M+ in venture funding (NVIDIA, Snowflake) with products deployed at the Pentagon, Amazon, NVIDIA, and Coca-Cola.

**SandboxAQ**

2023 – 2025

Principal Product Designer

AI · Quantum Security · Enterprise

- Sole designer on SandboxAQ's AI-driven post-quantum cryptography and security analytics platform, backed by Google, NVIDIA, and Breyer Capital
- Architected the complete product design system and component library from scratch, enabling engineering teams to ship enterprise-grade UI at scale
- Designed enterprise security dashboards and cryptographic inventory management tools deployed at Fortune 500 companies and U.S. government agencies
- Owned design end-to-end across discovery, definition, and delivery — from wireframes through high-fidelity Figma specs and developer handoff
- Partnered directly with CEO, CTO, and go-to-market leads to translate complex quantum security concepts into intuitive, enterprise-ready workflows
- Contributed to product narrative that supported \$285M+ in company valuation growth

**Reka AI**

2022 – 2023

Principal Product Designer

AI · LLM · Enterprise

- Sole designer on Reka AI's enterprise multimodal AI platform and language model evaluation suite, backed by Snowflake, NVIDIA, and Radical Ventures
- Designed the core AI chat interface, model playground, and API management console for enterprise clients
- Established Figma-based design system and defined design processes in a fast-paced research-to-product environment
- Translated abstract AI capabilities — multimodal understanding, function calling, context windows — into actionable UX for non-technical buyers
- Designed product experiences that directly supported the company's Series A and B fundraising
- Collaborated with ML researchers, PMs, and enterprise sales to ship features that accelerated customer acquisition

Lead Product Designer

Cybersecurity · Narrative Intelligence · Enterprise

- Sole designer on Blackbird.ai's narrative intelligence platform for disinformation detection, threat monitoring, and information warfare analysis
- Designed analyst-facing threat dashboards, executive intelligence reports, and real-time narrative tracking tools deployed at the Pentagon and defense agencies
- Built and maintained a comprehensive design system supporting rapid iteration across a complex multi-product platform
- Designed for security analysts, intelligence officers, and C-suite executives — deeply data-intensive, high-stakes workflows
- Established the company's first structured design practice: user research, design critiques, and cross-team design reviews
- Products actively used by the U.S. Department of Defense, Amazon, NVIDIA, and Coca-Cola
